

# John Deo's Development [Chennai] Journey

John has been given an assignment to enhance a CTM workflow and feature.

## Thoughts & Feelings

Why me?

Facing  
Uncertainty

Hopeful on  
getting quick  
response

Confident  
about  
Story

Drink more  
caffine

Exhaustive  
Hours

Why the  
requirments  
keep  
changing?

Do I need  
help?

Is the time  
sufficient

Will my code  
work?

Low on  
confidence

Expecting less  
Defects

Is my  
implementation  
right?

Have I  
followed  
coding  
standards?

Tensed

Have I met  
the  
requirments?

QA Defects

Have I missed  
any  
scenarios?

Expect the  
unexpected

Is BA & TPM  
happy?

Thank God  
it's Done!!!

Relief

## Description

- Requirement Understanding
- Existing Functionality
- Impact on Existing Functionality
- Raising doubt on the requirements
- Updating requirements & technical doc
- Identify dependencies
- Assign story points

- Stream/ environment setup
- Code changes
- New clarification during implementation
- Collaboration

- Perform UT/WB
- Integrate code changes
- Perform IT
- Raise defects
- Code Check-Ins
- Code Review Documents

- Perform Internal Review
- Perform External Review
- Incorporate review comments
- Seek Clarification, (if applicable)
- Update Version One

- Shore Dev Test, results with BA
- Get sign-off on acceptance criteria from BAs
- Code Promotion
- Ref Test
- Knowledge Sharing
- Inform QA to test
